Lester Snow  
Executive Director, CALFED  
1416 Ninth Street  
Sacramento, CA 95814

Dear Mr. Snow:

Please consider this letter a response to the revised CALFED plan.

I oppose CALFED's plan to increase surface water storage in the Central Valley by raising existing dams or building new offstream storage reservoirs. CALFED's plan to raise Shasta dam would flood segments of the upper Sacramento and McCloud rivers. CALFED's proposed sites offstream storage reservoir would require massive water diversions from the Sacramento River.

I urge CALFED to expand water efficiency, conservation, and reclamation programs to stretch our existing water supplies, instead of building new dams and canals. This could be done by switching to higher value and less water consumptive crops and by installing water meters for all agricultural and urban users.

I support CALFED's proposed restoration goals for the Central Valley, including removing some facilities such as the Englebright dam, that act as barriers

187  
787(2)  
to migrating salmon, acquiring important  
riparian habitat, and increasing instream  
flows for fish, wildlife, and recreation.

We cannot solve the ecological problems  
caused by dams and diversions, by  
building more dams and diversions.

Thank you for your time and consideration.  
I look forward to hearing your  
position on this issue.

Sincerely,  
Kathryn Naegeli
